TILDEN GILL PARK – KEY FEATURES

- A **medium density development** with capacity for 162 – 217 dwellings (30 – 40 dph) and amenity land and new footpath / cycleway connections
- The layout is **demountable** and could be reduced in size to scheme with only 26 or 39 dwellings (areas A or B and C respectively)
- **Gateway entrances** to a new '**Kent vernacular**' character area with a mix of detached and terraced houses fronting public streets with a series of nodal spaces
- Key or **feature buildings** to be positioned at nodal spaces and on main route vistas or visual axes
- **Roads to be relatively narrow** and with footpaths either side except for small areas off The Lane and The Drive where some shared surface / traffic calmed roads are proposed
- **Setting of Belgar Farm Listed Buildings** to be protected and new planting belt created around their curtilages. These would link in with a significant planting belt around the entire development and between the development and the AoNB to the south
- **Pocket parks** to be created as small amenity spaces suitable for either equipped or non-equipped play spaces and to be bounded by planting linking in with the wider '**wildlife corridor**' planting
- Whole development is within 750 – 1250 m of the main **Town Centre** shops, leisure centre, doctors surgery, dentist, library, infants / junior school etc
- Whole development is within 1250 – 1500 m of the **Homewood Secondary School**
- Whole development is between 800 – 1300 m from **Leigh Green Industrial Area** to the east off Appledore Road
- **New connections** and links to wider footpath network and to existing public open space north of Area C
