

Kent Fire & Rescue Service

in partnership with
Ashford Borough Council

Range of Available Sensors

Flood Detector - early detection of potential flood situations

Smoke Detector - raises an automatic alarm at the Monitoring Centre

Temperature Extremes Sensor - detects if cooker left on or freezing pipes*

Carbon Monoxide Detector - provides advanced warning of a build up of dangerous CO levels*

Natural Gas Detector - When the natural gas detector detects natural gas leaks the alarm will be raised. It can also be linked to a complete gas shut off solution

*dependent on location of device

Safety for Homes and Businesses

Ashford Telecare's vast new range of sensors means homes and business can be safer than ever before.

Working in partnership with Kent Fire and Rescue Service, our technology can ensure potentially-devastating accidents and mishaps including fires and gas leaks are detected at the earliest possible moment, even when properties are empty.

Who is it for?

- Ideal for domestic or business premises such as offices and warehouses which are left empty or unattended for long periods
- All family homes
- Particularly useful and potentially lifesaving in properties where occupiers are elderly, infirm, partially-sighted, hard of hearing or immobile.

How does the service help you?

Ashford Telecare provides low-cost 24-hour home monitoring incorporating a bogus caller button, with the ability to add other sensors, such as smoke and flood-detection, as and when desired. This means the unit is equally suitable for you and your family's personal Security.

What does the basic package consist of?

- The 400 (with Amie pendant) - the home hub will raise a call to the dedicated monitoring centre from anywhere in the home via the activation of a pendant or smoke alarm.
- A wireless smoke alarm is situated in an appropriate location in your home.
- Add on sensors can be purchased to suit needs of user.
