### **Summary of Approach Information for Ashford Borough Council - Rationale for TSM survey Collection**

Following a review of the tenant profile data, Ashford Borough Council took the decision to give all tenants an opportunity to respond by telephone, post or online as a census approach. This approach mirrored the approach undertaken in year one and year two and would allow us to reach a wide tenant base according to their contact preferences without excluding any households, and set quotas against the telephone surveys so that the results would not need to be weighted.

The telephone survey was proactively worked by trained external telephone interviewers, the statistics were monitored to track the number of incorrect numbers, refusals and barriers to completing, for example disability and language. The online, phone and postal surveys also allowed us to contact as many more tenants as possible and not exclude any tenants due to them not having a phone number or email address registered with us.

Postal surveys were also offered to customers who live in Ashford properties managed by another provider (Moat) where they did not have contact details recorded.
